

View participant roles and manage your stage presence - for participants

Content updated: 09/08/2026

 This article is designated for all users.

About

The **Participants** tab (**people icon**) lets you see who's in the session, including each participant's role and stage status. When you're on stage, you can also mute or unmute your microphone.

The **Participants** tab is available for sessions with a **Kaltura Room** component, such as Interactive sessions.

Understand participant groups

Depending on the session activity, participants are organized into the following groups based on their stage status:

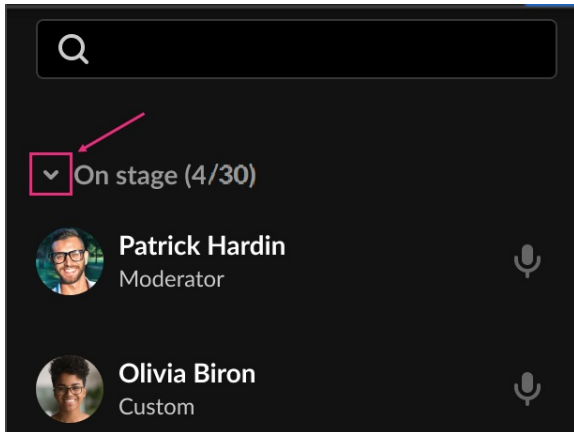

- **Raised Hands** – Participants who requested to join the stage.
- **On Stage** – Participants currently on stage.

- **Viewers** – Participants watching the session.

Icons next to a participant's name indicate relevant activity or status, such as a raised hand or microphone status.

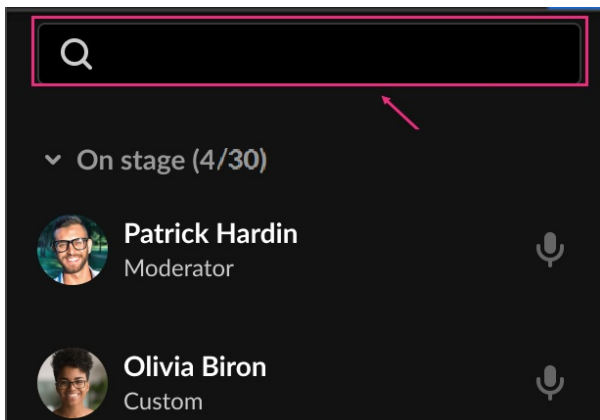

Expand and collapse groups

You can click the **arrow** next to each group name to collapse or expand it. If a group is large, use **See more** or **See less** to control how many names are shown.

Search for participants

Use the search bar at the top of the **Participants** tab to find a participant.

Mute or unmute your microphone

When you're on stage, click the **microphone icon** next to your name to mute or unmute yourself.
