

Share Direct Media Link - Admin Guide

Content updated: 09/21/2026

 This article is designated for administrators.

About

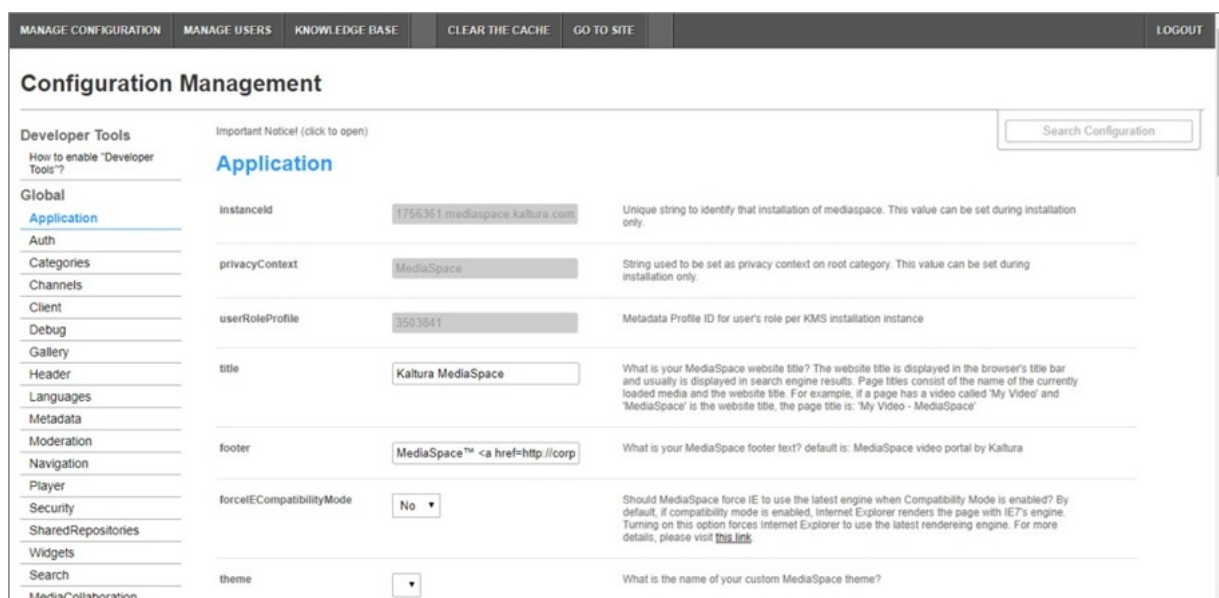

The Sharedirectmedialink module allows users to generate a secure direct mp4 link to Kaltura content. The sections herein will guide you through enabling and configuring the sharedirectmedialink module.

 This module is for both Content Hubs and legacy Video Portal users.

 For technical support, contact Kaltura Customer Care. For all other inquiries, reach out to your Customer Success Manager.

Configure

1. Access your Configuration Management console.

The screenshot shows the Configuration Management console with a sidebar on the left containing a list of configuration categories: Developer Tools, Global, Application (selected), Auth, Categories, Channels, Client, Debug, Gallery, Header, Languages, Metadata, Moderation, Navigation, Player, Security, SharedRepositories, Widgets, Search, and MediaCollaboration. The main content area is titled 'Configuration Management' and features a search bar. Below the search bar, there is a table of configuration items. The table has three columns: the configuration name, its current value, and a description. The items listed are: instancelid (1755361 mediaspace.kaltura.com), privacyContext (MediaSpace), userRoleProfile (3503841), title (Kaltura MediaSpace), footer (MediaSpace™ <a href=http://corp), forceIECompatibilityMode (No), and theme (a dropdown menu). Each item has a description explaining its purpose and how to set it.

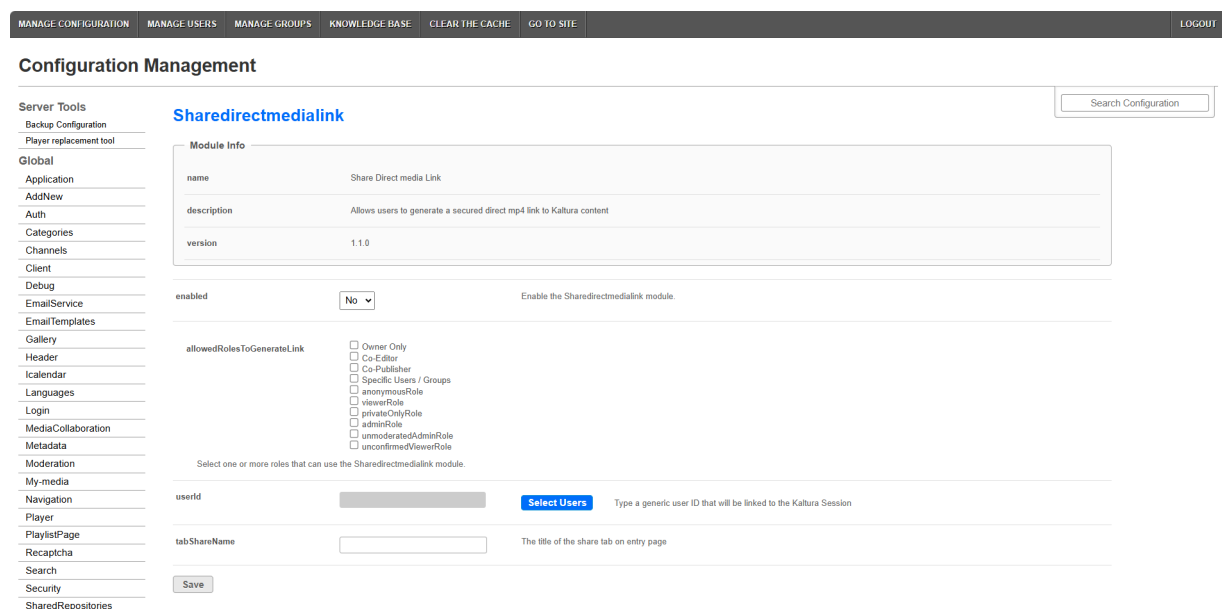

Configuration Item	Value	Description
instancelid	1755361 mediaspace.kaltura.com	Unique string to identify that installation of mediaspace. This value can be set during installation only.
privacyContext	MediaSpace	String used to be set as privacy context on root category. This value can be set during installation only.
userRoleProfile	3503841	Metadata Profile ID for user's role per KMS installation instance
title	Kaltura MediaSpace	What is your MediaSpace website title? The website title is displayed in the browser's title bar and usually is displayed in search engine results. Page titles consist of the name of the currently loaded media and the website title. For example, if a page has a video called 'My Video' and 'MediaSpace' is the website title, the page title is: 'My Video - MediaSpace'
footer	MediaSpace™ <a href=http://corp	What is your MediaSpace footer text? default is: MediaSpace video portal by Kaltura
forceIECompatibilityMode	No	Should MediaSpace force IE to use the latest engine when Compatibility Mode is enabled? By default, if compatibility mode is enabled, Internet Explorer renders the page with IE7's engine. Turning on this option forces Internet Explorer to use the latest rendering engine. For more details, please visit this link .
theme		What is the name of your custom MediaSpace theme?

2. In the list of configurable items on the left of your screen, locate and click on sharedirectmedialink.

The sharedirectmedialink item will be crossed out because it is disabled by default.

The sharedirectmedialink window displays.

The screenshot shows the 'Configuration Management' page for the 'Sharedirectmedialink' module. The interface includes a top navigation bar with links like 'MANAGE CONFIGURATION', 'MANAGE USERS', and 'GO TO SITE'. On the left is a sidebar with various server tools and global settings. The main content area is titled 'Sharedirectmedialink' and contains a 'Module info' box with fields for name, description, and version. Below this is an 'enabled' pull-down menu currently set to 'No'. Further down is a section for 'allowedRolesToGenerateLink' with a list of roles and checkboxes. At the bottom, there are fields for 'userid' and 'tabShareName'.

The **Module Info** box displays the module name, description (what enabling this module allows users to do), and version number.

3. In the enabled pull-down list, select **Yes** to enable the sharedirectmedialink module.

Other configurable items following the enabled pull-down list are as follows.

Configuration Name	Options	Description
allowedRolesToGenerateLink	Owner Only Co-Editor Co-Publisher Specific Users/Groups anonymousRole viewerRole privateOnlyRole adminRole unmoderatedAdminRole unconfirmedViewerRole	Select one or more roles that can use the Sharedirectmedialink module.

userId	Select from a list of users	Click Select Users , then enter a user ID or name and click Submit . This is the user ID that will be linked to the Kaltura session.
tabShareName	Free text	The title of the share tab on the entry page.

7. Click **Save**.

You receive a notice that your configuration for sharedirectmedialink was saved and the cache was cleared.

End user experience

Once enabled and configured, a new capability is added to the entry page that allows users to share the URL. This capability is displayed for Content Hub users as part of the three dots actions menu on the entry page, and for legacy Video Portal users as an additional tab under "Share", added to the entry page.

Content Hubs users:

Once enabled and configured, the Share Direct Media Link option appears in the **three dots actions menu** on the entry page for the end user.

The screenshot shows the Kaltura video player interface. At the top, there is a navigation bar with links: Home, Agenda, Tracks, Resources, Faq, and an Executive Lounge button. A search bar and a user profile icon are also present. The main video area displays a smiling woman. A modal titled "Share Directmedia link" is open, showing a "Share URL" field with the text "http://1954611-2.qakmstest.dev.kaltura.com/media Kaltura+Video+Soluti" and a "Copy" button. Below the video player, the video title "Opening keynote: Cloud inside and out" is displayed, along with the author "By Eric Grant" and the date "September 12, 2023". The video has "1.4 K Views". There are buttons for "Corporate Marketing" and "Take Survey Please share your feedback". The description mentions "Brandname Events" and "Brandname". Below the description, there are two speakers: "Helen Patrick" (EVP Product, Brandname) and "William Herzog" (Product Manager, Brandname). There are "3 Attachments" listed: "Logo.png", "Brand Guidebook.pdf", and "Podcast.mp3". On the right side, there is a "Related Media" section with five video thumbnails and titles: "Brandname Connect Opening Keynote", "Brandname Looking into the Future", "Shaping Our Tools", "StarHub Cloud Infinity vision with Brandnam Specialist", and "Insights powered by Brandname".

Legacy Video Portal users:

Once enabled and configured for legacy Video Portal users, the Share Direct Media Link option appears as an additional tab under "Share" on the entry page. Select to copy the URL.
