Change your site's language in Content Hubs

Content updated: 09/27/2026

This article is designated for all users.

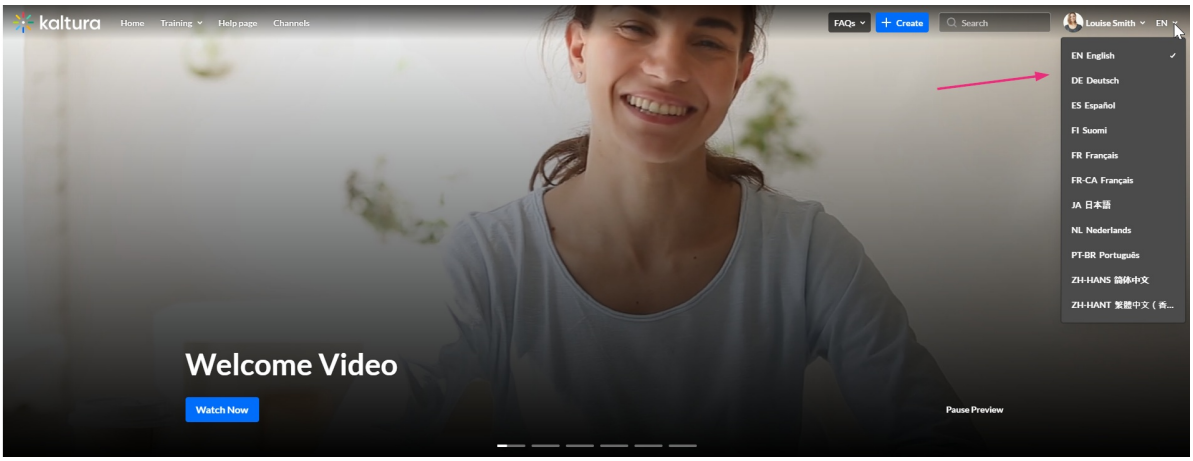

About

You can change the language used for menus, navigation, and other interface text in your Content Hub. The languages you can choose depend on what your administrator has enabled.

Changing the display language does not translate media titles, category names, or other text entered by users or administrators.

Change the display language

1. In the upper-right corner of your Content Hub, click the language selector.

2. Select your preferred language from the dropdown.

The interface displays in the selected language. Your choice is saved in a browser cookie and remains active until the cookie is cleared.

- When you select Arabic, Hebrew, Persian (Farsi), Urdu, Yiddish, Syriac, Divehi (Maldivian), Pashto, or Sorani Kurdish, the site displays in a right-to-left layout.
- If the language you need is not listed, contact your site administrator. Administrators can add and customize languages in the Languages module.
