

Install Content Hubs as an app on your device

Content updated: 09/30/2026

 This article is designated for all users.

About

You can install your organization's **Content Hubs** site as an app on your phone, tablet, or computer, with no app store needed.

The app opens the site in its own window, with the same login and content as in your browser. On a phone, you can open it straight from your home screen instead of finding it in your browser.

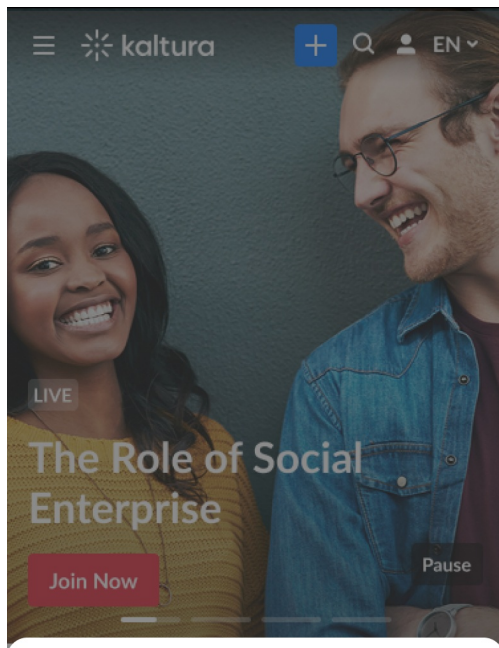

This feature requires the [Webapp module](#) to be enabled. If you don't see an install banner on your site, contact your administrator.

Before you start

Open your organization's Content Hubs site using its web address or a link shared with you. Use a [supported browser](#), and don't use a private or incognito window.

If the **Incompatible browser** popup opens, select **Copy link** and paste the link into a supported browser. On an iPhone or iPad, use Safari.

Incompatible browser

[App name]
www.kino.com

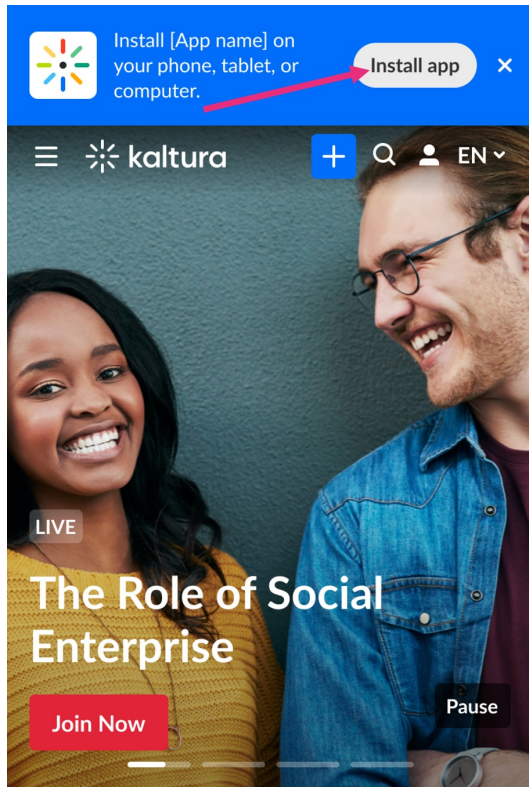

Your current browser may not be compatible with this functionality. Copy the link below and paste it into Chrome or Safari (not in a private window) to continue.

 Copy link

Install the app on a phone or tablet

iPhone or iPad

1. Open the site in Safari.
A banner appears at the top of the page.
2. Select **Install app**.

The **Install the app** popup opens.

Install the app

[App name]
www.kino.com

1. Press  in the browser menu
2. Scroll down and tap **Add to Home Screen**
3. look for the app  icon on your home screen
3. Select the **Share** icon.
4. Scroll down and select **Add to Home Screen**.
5. Select **Add**.

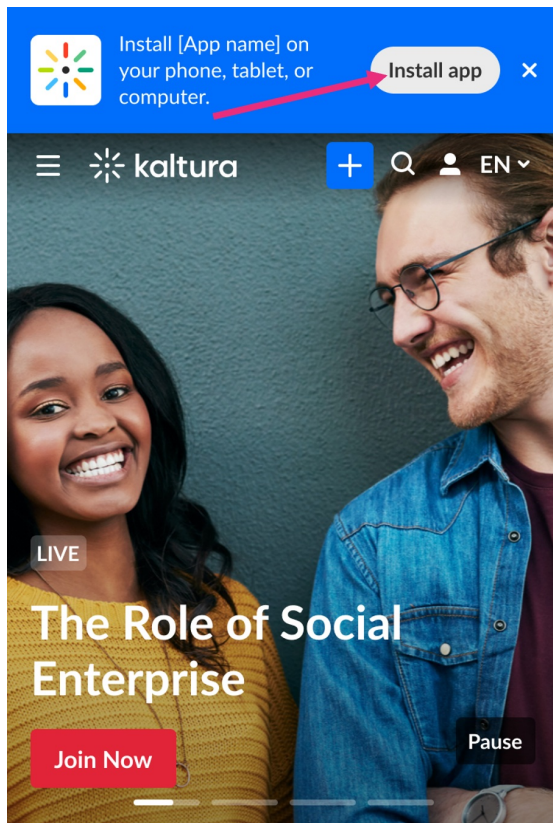

The app icon appears on your home screen.

Safari can't tell that you've installed the app, so the banner can still appear when you open your site in Safari. Close it and open the app from your home screen instead.

Android phone or tablet

1. Open the site in Chrome, Edge, Samsung Internet, or Opera.
A banner appears at the top of the page.

Chrome or Edge

1. In the banner, click **Install app**.
2. Follow your browser's prompt to install the app.

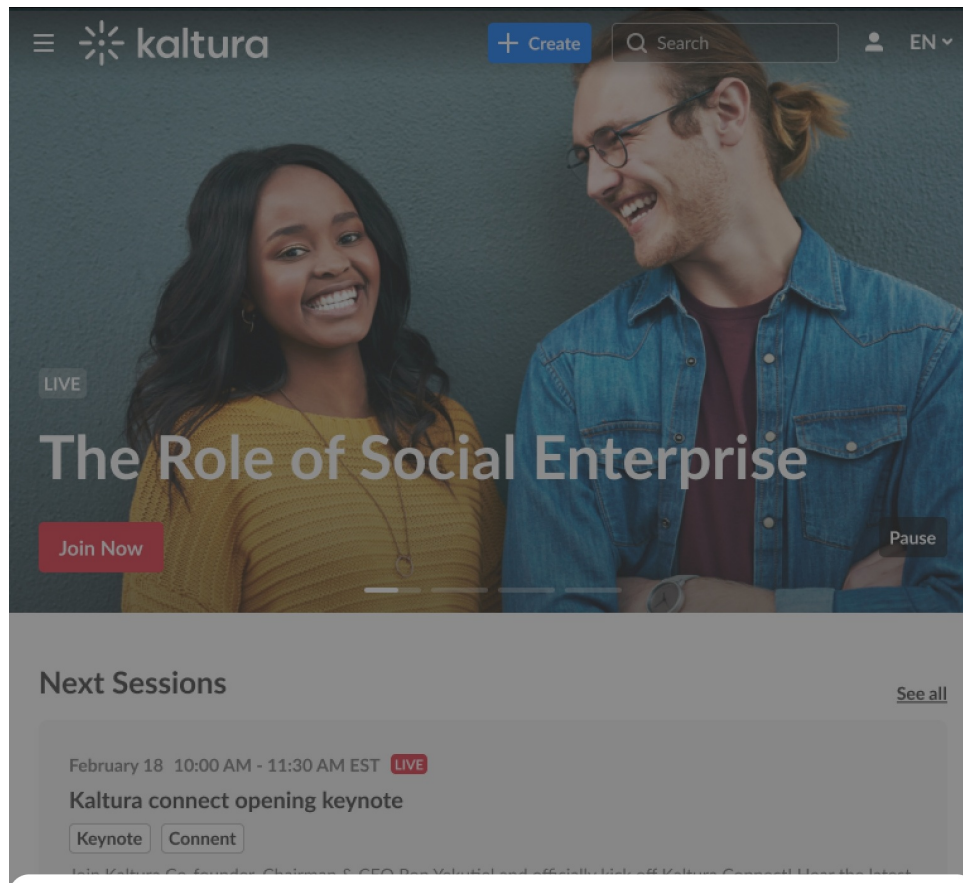

The app opens in its own window.

You can also install the app from the install icon in your browser's address bar. It opens the same prompt.

Safari on a Mac

1. In the banner, click **Install app**.

The **Install the app** popup opens with the steps.

Install the app

[App name]
www.kino.com

1. Press  in the browser menu
2. Scroll down and tap **Add to Dock**
3. look for the app  icon on your dock

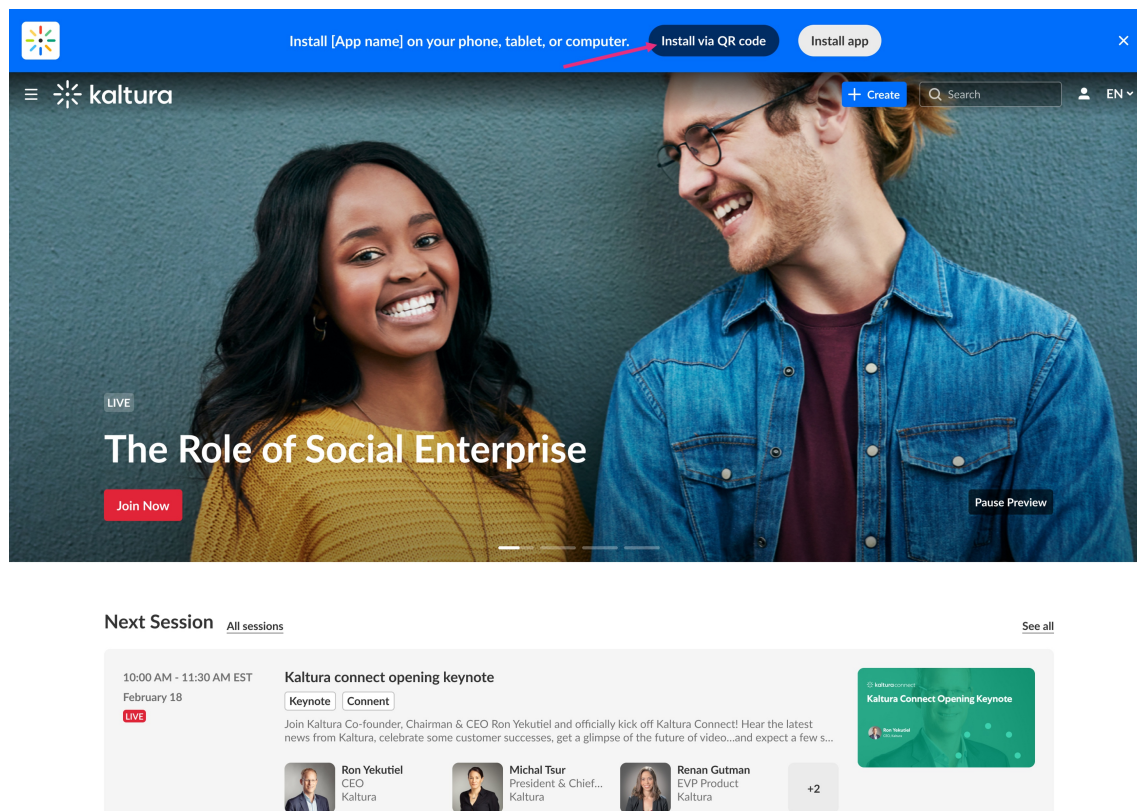

2. In the browser toolbar, click the **Share** icon.
3. Click **Add to Dock**.
4. Click **Add**.

The app icon appears in your Dock.

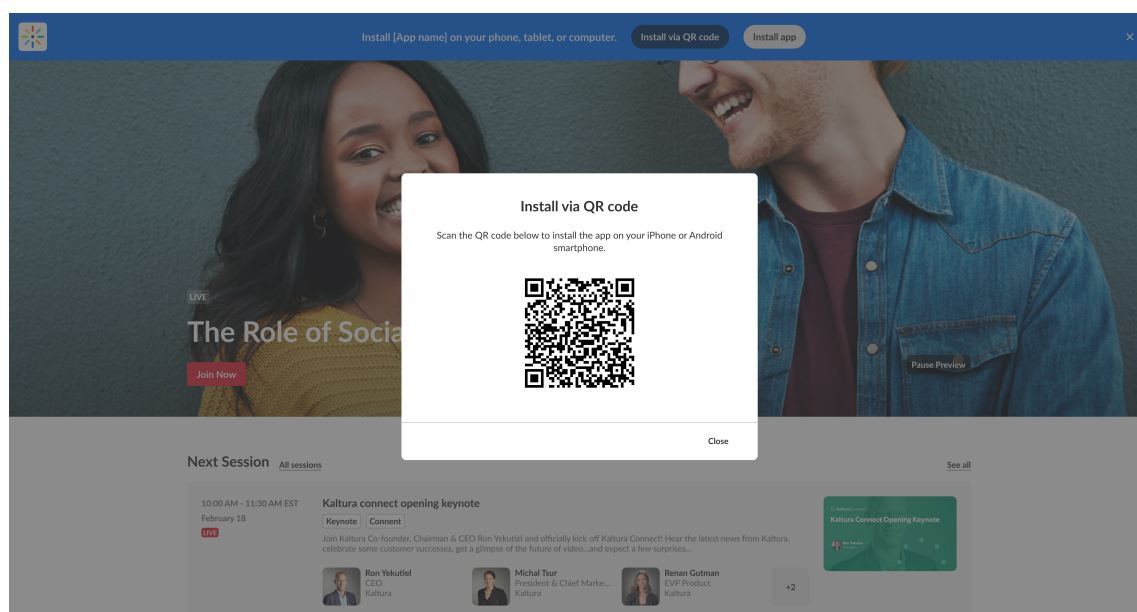

Install the app on your phone using a QR code

If you're on your computer and want the app on your phone, use the QR code instead of typing your site's address on your phone.

1. In the banner at the top of your site, click **Install via QR code**.

The **Install via QR code** window opens.

2. Scan the QR code with your iPhone or Android phone.
The site opens on your phone.
3. Follow the installation steps for your phone above.

Uninstall the app

Uninstall the app the same way as other apps on your device.
