About

Real-time live transcription displays real-time captions during a Kaltura Room session so you can follow along as people speak. When a moderator/host starts transcription, captions appear as an on-screen overlay; you can use the **CC** control in the room toolbar to show or hide captions on your own screen at any time.

If you do not see the **CC** control in the room toolbar, your Kaltura Room configuration may not include this feature.

Show or hide the transcript

1. Select the **CC** icon to the right of the gear icon.
2. Select the **CC** icon again to toggle the transcript visibility.
   - A **blue CC** icon indicates that transcription is shown.

- A **gray CC** icon indicates that transcription is hidden.

Hiding the transcript affects **only your view**. The setting remains in effect for the rest of the current session and resets when you join a new session.
