

SCORM - Admin Guide

Content updated: 10/06/2026

 This article is designated for administrators.

About

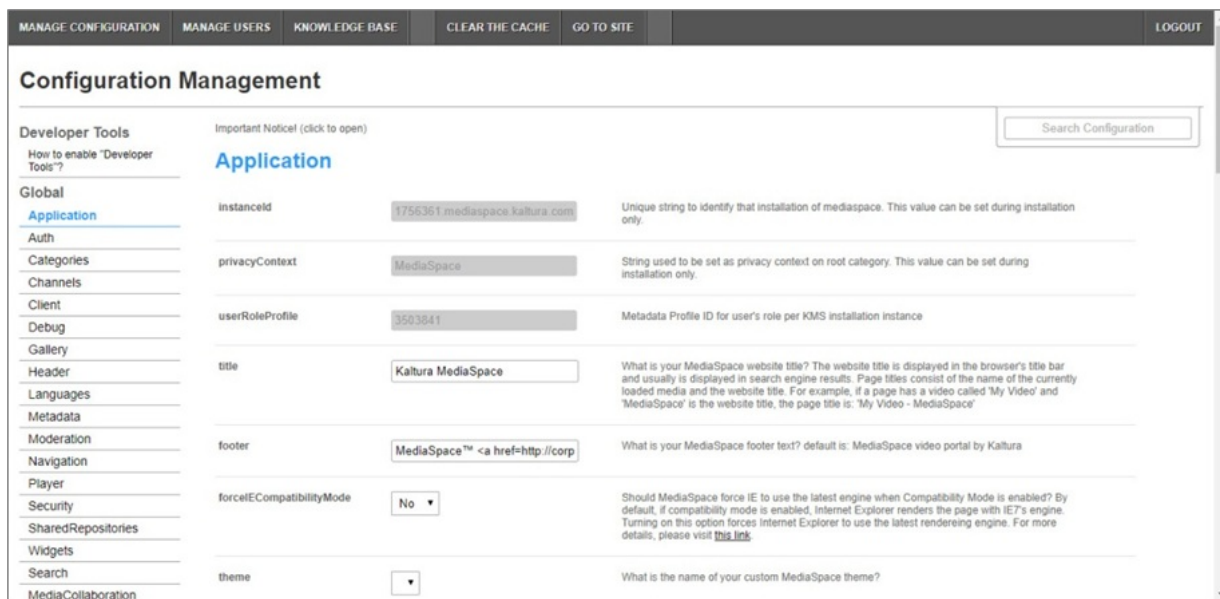

The SCORM module lets users package a video for their LMS so learners' viewing progress and completion can be tracked. When the module is enabled, a SCORM Package tab appears under Share for users with permission to download SCORM packages. This tab contains a link to download the package. The following sections explain how to enable and configure the Scorm module.

 This module is for both Content Hubs and legacy Video Portal users.

 For technical support, contact Kaltura Customer Care. For all other inquiries, reach out to your Customer Success Manager.

Configure

1. Access your Configuration Management console.

The screenshot shows the 'Configuration Management' console. On the left is a sidebar with a list of configuration categories: Developer Tools, Global, Application (selected), Auth, Categories, Channels, Client, Debug, Gallery, Header, Languages, Metadata, Moderation, Navigation, Player, Security, SharedRepositories, Widgets, Search, and MediaCollaboration. The main area displays the 'Application' configuration settings. At the top of this area are links for 'Important Notice!' and 'Application', and a 'Search Configuration' box. The settings are listed in a table-like format with labels, input fields, and descriptions.

Label	Value	Description
instanceId	1755361.mediaspace.kaltura.com	Unique string to identify that installation of mediaspace. This value can be set during installation only.
privacyContext	MediaSpace	String used to be set as privacy context on root category. This value can be set during installation only.
userRoleProfile	3503841	Metadata Profile ID for user's role per KMS installation instance
title	Kaltura MediaSpace	What is your MediaSpace website title? The website title is displayed in the browser's title bar and usually is displayed in search engine results. Page titles consist of the name of the currently loaded media and the website title. For example, if a page has a video called 'My Video' and 'MediaSpace' is the website title, the page title is: 'My Video - MediaSpace'
footer	MediaSpace™ <a href=http://corp	What is your MediaSpace footer text? default is: MediaSpace video portal by Kaltura
forceIECompatibilityMode	No	Should MediaSpace force IE to use the latest engine when Compatibility Mode is enabled? By default, if compatibility mode is enabled, Internet Explorer renders the page with IE7's engine. Turning on this option forces Internet Explorer to use the latest rendering engine. For more details, please visit this link .
theme		What is the name of your custom MediaSpace theme?

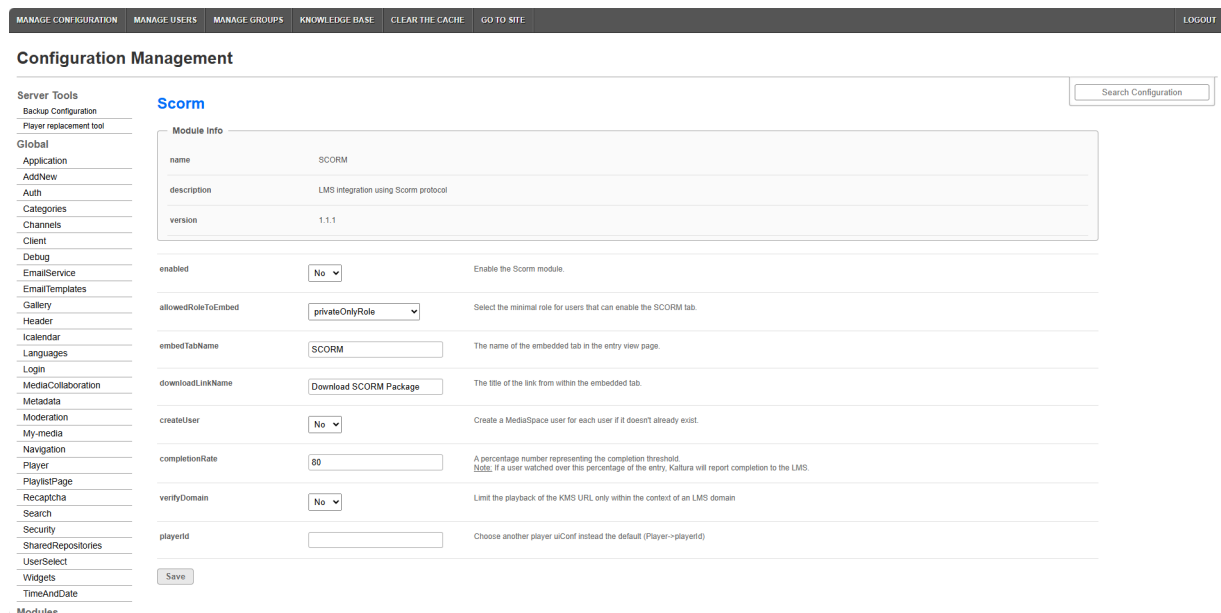

2. In the list of configurable items on the left of your screen, locate and click on

Scorm.

The Scorm item will be crossed out because it is disabled by default.

The Scorm window displays.

The screenshot shows the 'Configuration Management' page in the Kaltura interface. The 'Scorm' module is selected. The 'Module Info' box displays the following details:

Module Info	
name	SCORM
description	LMS integration using Scorm protocol
version	1.1.1

Below the 'Module Info' box, there are several configuration options:

- enabled:** A pull-down menu set to 'No'. Description: Enable the Scorm module.
- allowedRoleToEmbed:** A pull-down menu set to 'privateOnlyRole'. Description: Select the minimal role for users that can enable the SCORM tab.
- embedTabName:** A text field containing 'SCORM'. Description: The name of the embedded tab in the entry view page.
- downloadLinkName:** A text field containing 'Download SCORM Package'. Description: The title of the link from within the embedded tab.
- createUser:** A pull-down menu set to 'No'. Description: Create a MediaSpace user for each user if it doesn't already exist.
- completionRate:** A text field containing '80'. Description: A percentage number representing the completion threshold. Note: If a user watched over this percentage of the entry, Kaltura will report completion to the LMS.
- verifyDomain:** A pull-down menu set to 'No'. Description: Limit the playback of the KMS URL only within the context of an LMS domain.
- playerId:** A text field. Description: Choose another player uConf instead of the default (Player~playerId).

A 'Save' button is located at the bottom left of the configuration area.

The **Module Info** box displays the module name, description (what enabling this module allows users to do), and version number.

3. In the enabled pull-down list, select **Yes** to enable the Scorm module.

Other configurable items following the enabled pull-down list are as follows.

Configuration Name	Options	Description
allowedRoleToEmbed	viewerRole privateOnlyRole adminRole unmoderatedAdminRole unconfirmedViewerRole Specific users/groups	The minimum application role allowed to download a SCORM package. Can be configured for specific users/groups.
embedTabName	Free text	The name of the embedded tab in the entry view page.
downloadLinkName	Free text	The title of the link from within the embedded tab.

createUser	Yes or No	Create a Content Hubs or legacy Video Portal user for each user if it doesn't already exist.
completionRate	Free text	A percentage number representing the completion threshold.
verifyDomain	Yes or No	Limit the playback of the Content Hubs or legacy Video Portal URL only within the context of an LMS domain.
playerID	Free text	Choose another player uiConf instead of the default.

7. Click **Save**.

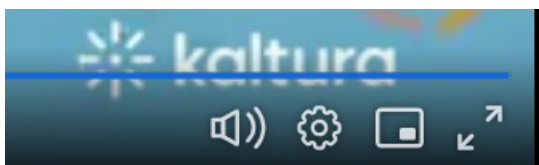

You receive a notice that your configuration for Scorm was saved and the cache was cleared.

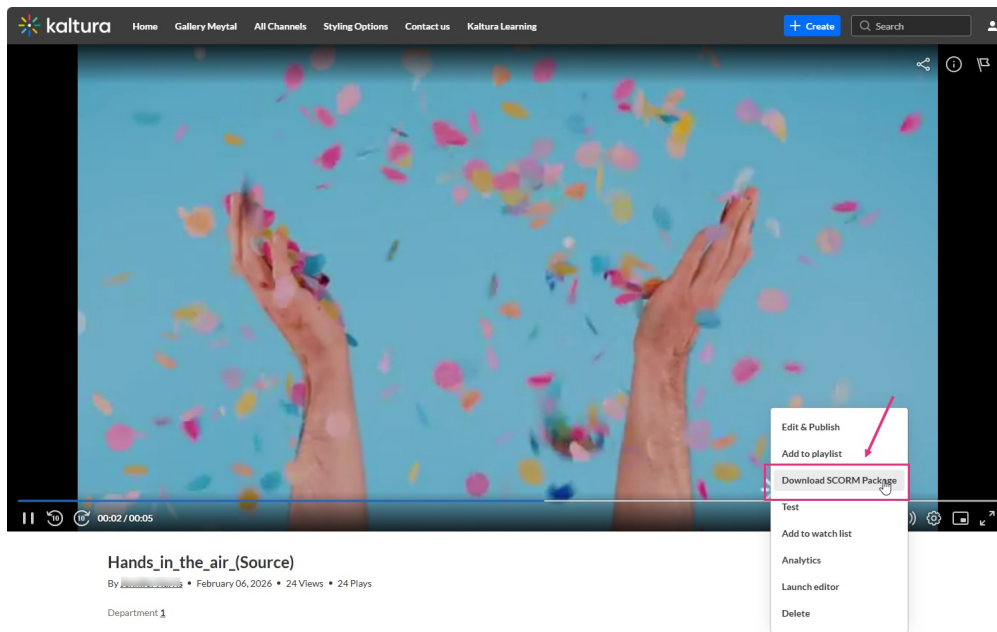

End user experience

Once enabled and configured, a new capability is added to the entry page that allows users to download the SCORM package. This capability is displayed for Content Hub users as part of the three dots actions menu on the entry page, and for legacy Video Portal users as an additional tab under "Share", added to the entry page.

Content Hubs users:

Once enabled and configured, the Download SCORM package option appears in the **three dots actions menu** on the entry page for the end user.

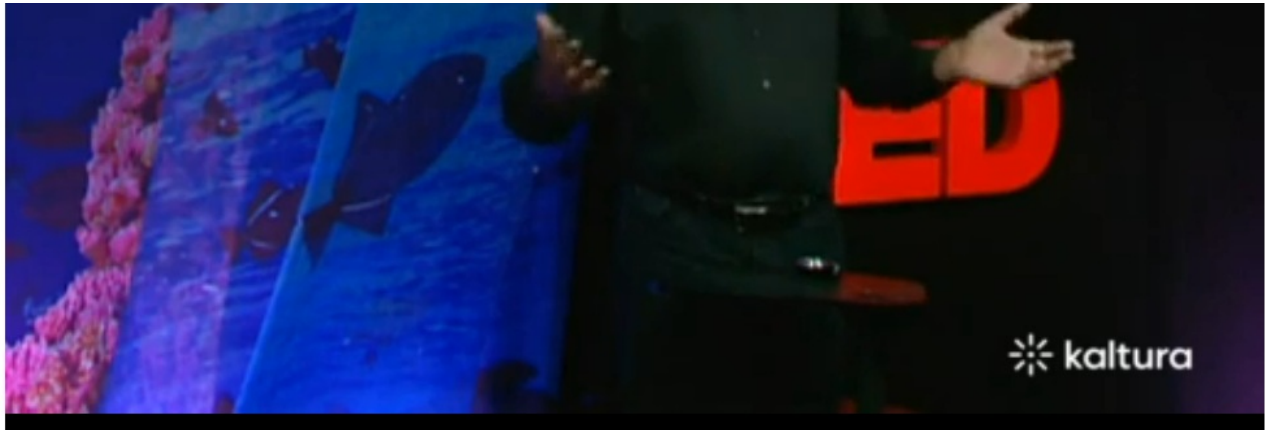

After selecting the Download SCORM Package option in the **three dots actions menu** on the entry page, the package is downloaded for the user.

Legacy Video Portal users:

Once enabled and configured for legacy Video Portal users, the SCORM option appears as an additional tab under "Share" on the entry page. Select to download the package.
